WYKŁAD 3

- RecyclerView
- Adapter
- ViewHolder
- ViewPager2

Figure 1. A list using RecyclerView

Figure 2. A list also using CardView

RecyclerView

RecyclerView
(reuse-view)

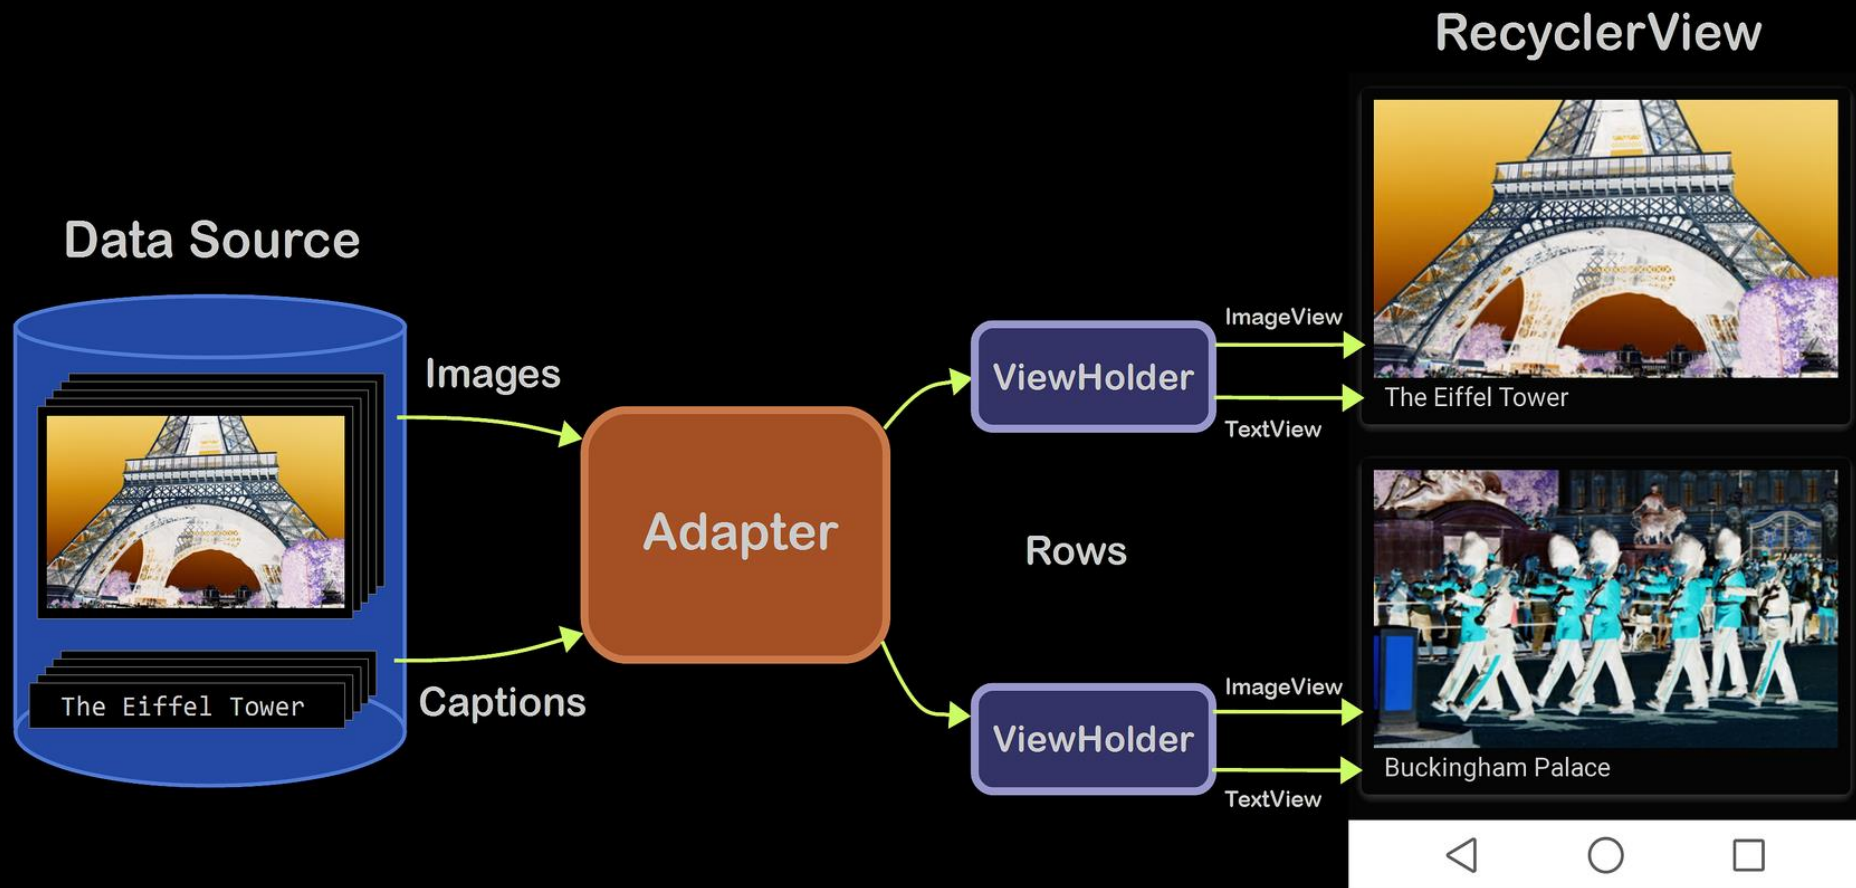

Swipe Up

The most important classes of the RecyclerView API

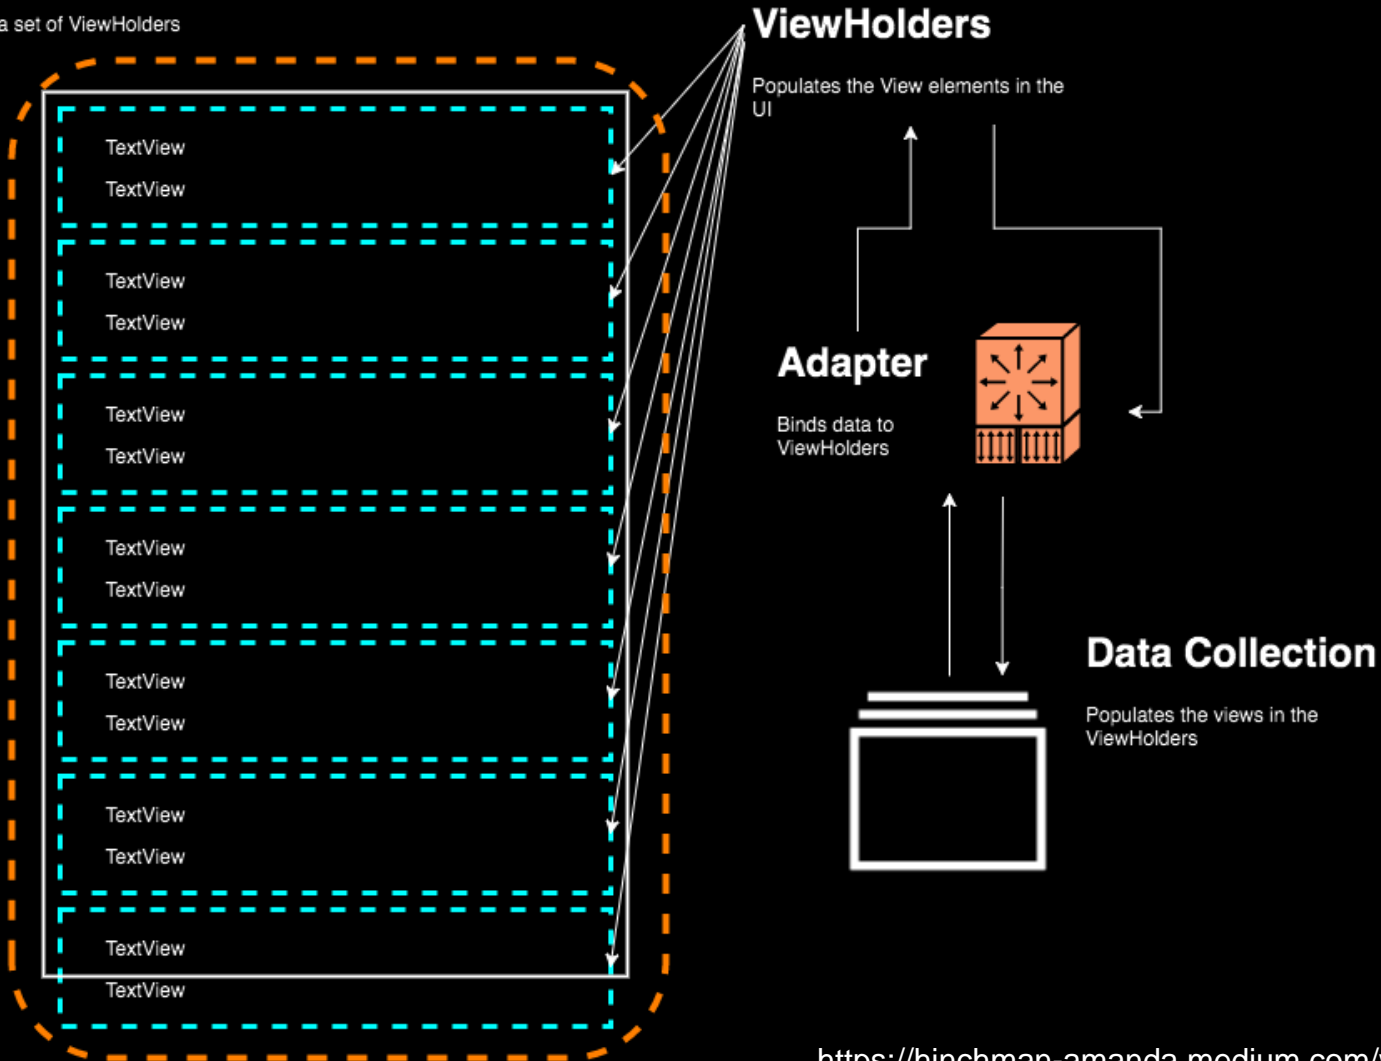

Class	Usage
Adapter	Wraps the data set and creates views for individual items
ViewHolder	Holds all sub views that depend on the current item's data
LayoutManager	Places items within the available area
ItemDecoration	Draws decorations around or on top of each item's view
ItemAnimator	Animates items when they are added, removed or reordered

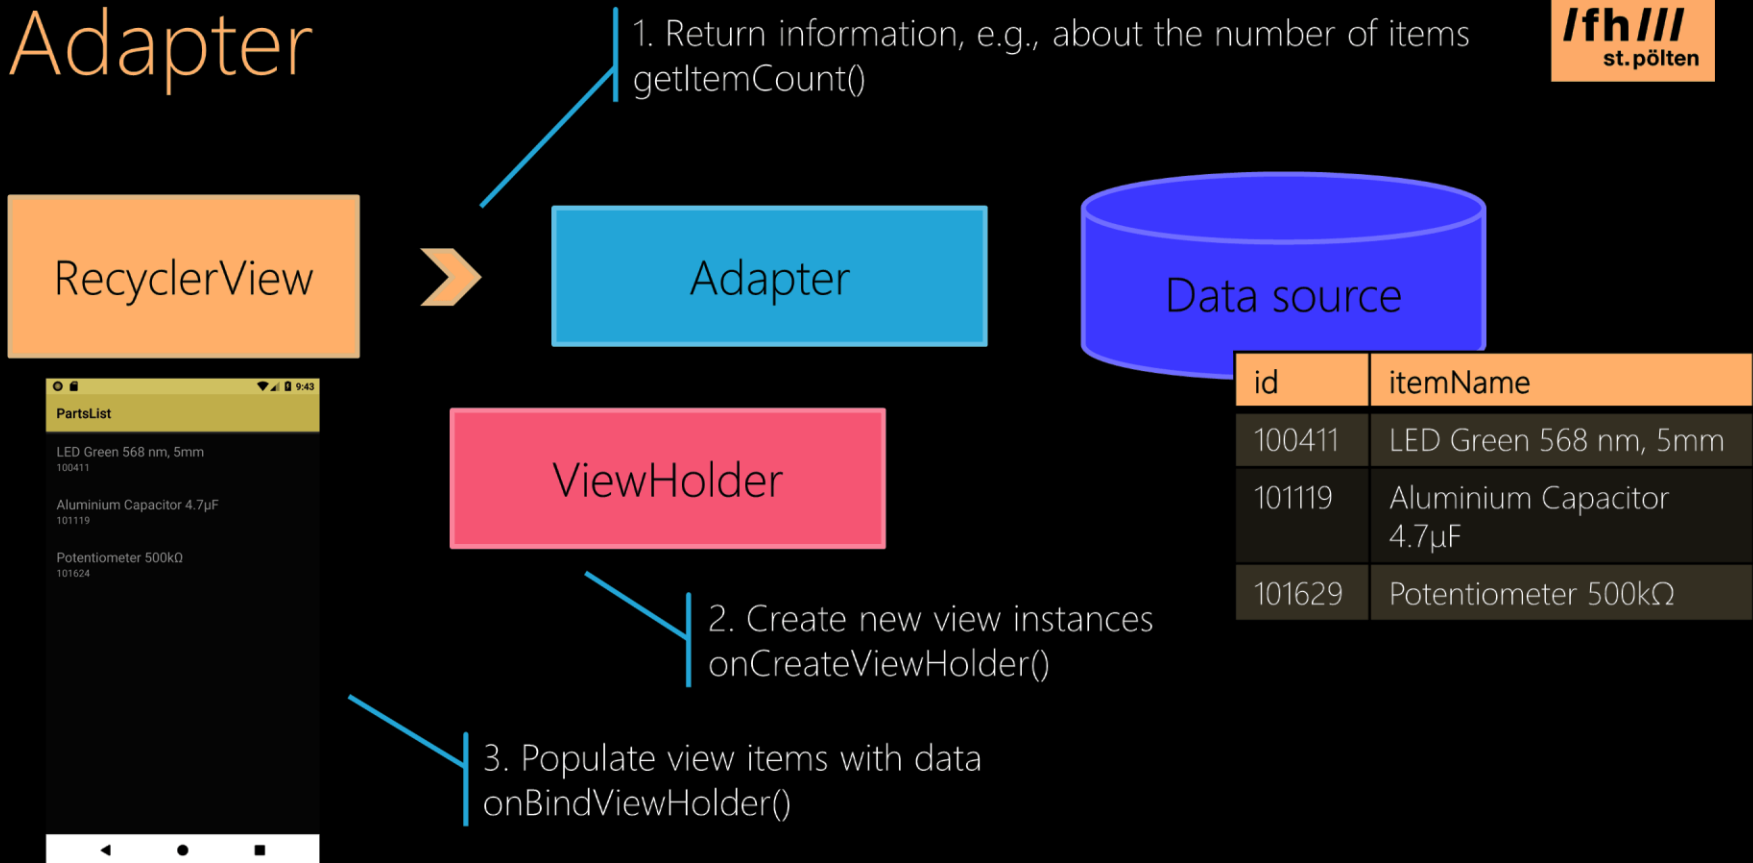

RecyclerView

Recycles data within a set of ViewHolders

Adapter

RecyclerView

word_list_item.xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="match_parent"
    android:orientation="horizontal"
    android:layout_height="wrap_content">

    <TextView
        android:id="@+id/singleWord"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:textSize="24sp"/>

</LinearLayout>
```

word_list_item.xml

```
<?xml version="1.0" encoding="utf-8"?>
